- Business representation at trade fairs and markets.

Our Services

Our polylingual team break through the awful language barrier most others face when dealing in international trading

- KAPAK provides high quality inspection and factory verification through the use of our specialized quality control agents and international laboratories.
- Prioritize risk management to eliminate fraudulent products and optimize on safety: We supply inspectors in China, South East Asia, Europe, Middle East and the Americas.
- Secure documentation for smooth job deliveries. The product cannot enter the country of destination without them. We ensure all documents and certifications to avoid hold ups at the border. We perform due diligence and scope factory's before we proceed not to waste time or resources.
- Why buy through our company? We are an established Chinese company. Buying through our company allows us to represent you and take the supplier through the Chinese court system if any problems or disagreements arise.

Our Value Added Services

In many key markets, we provide value added services and inputs that enhance customer experience and allow for better management of your shipments. Our efforts, customer-centricity and focus to provide you a complete range of logistics services are what make us an ideal logistics partner across the world.

Success is the Result of Risk Reduction

SOURCING & QUALITY CONTROL

Success is the Result of Risk Reduction

Supplier Evaluation

Basic Supplier Verification - Basic tool to confirm company name, business nature (trading/manufacture), registered address, shareholders name and taxpayer number.

Supplier Verification - Detailed investigation based on government obtained public data information. Report includes expert opinion on investigated supplier.

Factory Audit - Detailed on site assessment of factory, including legality, production quality, facilities, quality and management system. Final report includes pictures and videos.

SOURCING & QUALITY CONTROL

Success is the Result of Risk Reduction

Inspection

Pre-production inspection - Conducted at the beginning of production or even before it starts. Raw material and components check. Detect quality issues within preliminary stages to avoid loss or delays.

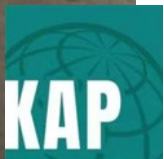

Sample Selection – We pluck a sample at random from the production line. Selected samples are sealed with TISCO tape and delivered to the customer or the laboratory.

Production Inspection – Conducted once 20%-50% of production is ready. Our Quality Control Agent validates initial production process. He/she makes sure that goods meet quality requirements and customer's specifications. We also offer inspection services during production and before being sent out of the factory.

Production Monitoring - Our engineer reports onsite on production and quality control whilst supervising your production process from raw material until the final product.

Pre-shipment inspection - Conducted once 100% production is finished and packed in cartons. Compulsory quality inspection of whole order when goods are still at warehouse in origin country.

Container loading supervision - Thorough loading documentation and seal placement ensures that the supplier has packaged correct products in the right amounts within the container.

Partners

We maintain strategic alliances with companies that provide specialized services. They help us fulfill jobs promptly and efficiently.
